PERSONAL STATEMENT

Working with website (**back-end and front-end**) development since the beginning of the year 2021, I have co-founded and developed multiple websites which impact 15.000 consumers in more than 6 states. Always concerned with the User Experience and using data-metrics to reach high retention rates.

WORK EXPERIENCE

Founder & Basic Web Developer

At Roux Host

February 2021 - May 2021

Roux Host is a platform that sells web hosting, virtual machines to host servers and teamspeak.

- I've been working together with the product team and stakeholders, developing new features and scaling the app up 3.000 users.
- Creating a new website, using concepts of UI state, immutability, reactive programming with TypeScript to back-end and React to front-end.
- Data security along with user experience are very important aspects in our product. I had the opportunity to implement encryption using Base64.

Founder & Intermediate Developer

At DripCode

August 2021 - October 2021

DripCode is an online store that sells vehicle texturing for FiveM and maps using 3ds max and blender.

- I've been working together with the product team and management, in developing new products and scaling store to future new clients.

- We create on-demand texturing and map creation (3d) products for FiveM, using photoshop for texturing and blender and 3ds max for map creation.

Founder & Intermediate Developer

At (OttonCode) (Purple Shop)

(January 2022 - June 2022) (August 2022 - November 2022)

(As lojas que eu já criei até o final de 2022 foi para o nicho do Gta V / FiveM)

OttonCode and PurpleShop is a virtual store that sells ready-made scripts, with the aim of helping FiveM servers grow.

- I've been working together with the product team and management, in developing new products and scaling store to future new clients.
- We create the products, using concepts of UX UI state, immutability, reactive programming with TypeScript and React for Front-End and Lua for Back-End (Language GTA V/FiveM).
